

## **The RATP/CaetanoBus partnership powered by Forsee Power**

**Forsee Power will equip CaetanoBus' hydrogen bus with its Pulse 15 battery system.**

**Paris, January 27<sup>th</sup>, 2020** - Forsee Power, the expert in smart battery systems and a key player in the electromobility market, has been working for two years with the leading Portuguese bus and coach manufacturer, CaetanoBus. Their 100% electric buses run in many European cities like London, Lisbon or Braga. For its new H2.City Gold hydrogen bus, the manufacturer once again partner with Forsee Power.

Forsee Power develops state-of-the-art technologies that answer all the needs and constraints imposed by the electric bus market: autonomy, power, life cycles, and safety. Forsee Power is tackling the challenge of hydrogen propulsion with its high-power Pulse 15 batteries. Batteries are installed on the roof and associated with 5 hydrogen tanks. Thus, the H2.City Gold can travel up to 400 km in zero-emission mode with the combination of Forsee Power battery systems and fuel cells.

A partnership between CaetanoBus and RATP has been announced for a first hydrogen bus in Paris. As the Parisian operator pointed out in its press release on November 26<sup>th</sup>: *«RATP wants to master all technologies and continues to test new energies»*.

Christophe Gurtner, CEO of Forsee Power adds, *"We are proud to support CaetanosBus in this new hydrogen propulsion solution. Their partnership with RATP once again proves that this key transport operator is dedicated to making the French capital a clean and sustainable city. The same values that drive the Forsee Power's teams everyday "*.

Forsee Power has the widest range of lithium-ion batteries suitable for 100% electric or hybrid vehicles (hydrogen or ICE). These solutions adapt to all charging modes and cover all the power and energy needs of public transport, especially for the bus.

### **About Forsee Power**

Forsee Power is an industrial Group specializing in smart battery systems for the electric transport (scooters, buses, trains, trucks, boats). As a major commercial and industrial player in Europe, China and North America, the Group designs, assembles and supplies energy management systems based on the most robust cells on the market, as well as provides installation, commissioning and on-site or remote maintenance. With its modular solutions, Forsee Power guarantees that customers buying its batteries enjoy security, energy efficiency, thermal management, long-term reliability and long working life.

The Group also offers financing solutions (battery rental) through its participation in NEoT Capital and second life solutions for transport batteries.
