

# 5 things you need to know about electric buses

by Forsee Power

E-buses reduce noise pollution as they run silently.

E-buses improve air quality as they eliminate emissions.

E-buses' cost is lower than diesel's.

E-buses can have a second life in buildings, thus postponing recycling for many more years.

E-buses can run up to 300 km with 1 single charge, allowing full autonomy during the day.
