Omega Seiki Mobility (OSM) signs MoU with battery system expert Forsee Power to enhance battery performance of its product range

New Delhi, July 09, 2021 – Omega Seiki Pvt Ltd, part of Anglian Omega Group of companies and Forsee Power, a global expert in smart battery systems for the electromobility market today announced a strategic partnership to provide Lithium-ion batteries technology for OSM entire range of Commercial Vehicles. OSM commercial electric vehicle equipped with Forsee Power GO 10 Li-Ion battery system – 48V, 10 kWh – will give enhanced battery range of 120 Kms when fully loaded.

Partnering with Forsee Power, Omega Seiki Mobility is thriving to leverage their leading cutting-edge Li-Ion battery technology. Forsee Power develops innovative solutions with the latest and robust battery cells and best-in-class Battery Management Systems that integrate high-performance electronics, accurate voltage readings and efficient communication systems.

On partnership with Forsee Power **Mr. Uday Narang, Chairman, Omega Seiki Mobility** said *“I am thrilled to partner with Forsee Power. We share the same philosophy to contribute in reducing the carbon footprint and commitment to sustainable operations. We at Omega Seiki Mobility are all about providing solutions, today many buyers are struggling with range anxiety. We identified the issue and partnered with the leading company in battery technology to enhance the range of Omega Seiki Mobility vehicles. We hope to have a long and fruitful association with Forsee Power.”*

PRESS RELEASE

FORSEE
POWER

“We are very pleased to start this collaboration with Omega Seiki Mobility that illustrates very well the reason we established in Pune in 2020, to support the electrification of mobility in India with a FAME 2-compliant industrial base. Forsee Power is a battery systems leader on the light and heavy vehicles market. We offer a complete range of FORSEE GO portable and onboard battery systems for 2 and 3 wheelers and I look forward to more projects with Omega Seiki Mobility” commented **Durga Akhnoor, CEO of Forsee Power India.**

In May 2021, Forsee Power began the production in series of batteries for electric two and three wheelers in India. This is a significant step for the Group that entered the Indian market in 2020.

Omega Seiki Mobility is a leading player in the Electric vehicles space in India. The company has designed, developed, and now manufacturing its own 3-wheeler EVs under RAGE+ brand. The company also launched a refrigerated vehicle under brand name FROST recently to take care of vaccine and food deliveries. Omega Seiki likes to call itself “Technology in motion” company and has been tying up with leading players in battery, charging infra and powertrains.

Contributing to reducing the carbon footprint in India

Forsee Power contributes to reducing the carbon footprint in India (this country being responsible for one of the largest increases in global CO2 emissions in 2018). Forsee Power has the complete range of batteries for the electromobility market and thus meets all electrification needs of light and heavy vehicles whether on road, rail, or water. Forsee Power goes beyond the battery, offering solutions for managing the second and end of life of batteries.

“Battery is the most important part of an EV. With a global technology leader like Forsee Power on board, we would be providing our customers with smart battery systems which are efficient and use latest technology. That is the essence of a disruptive technology. We are very excited to be working with Forsee Power” says **Dr. Deb Mukherji MD of Omega Seiki Mobility.**
