

Quality policy

Expert in battery systems for a sustainable electromobility and leader in our markets, Forsee Power is committed to delivering satisfaction to its stakeholders as the main objective of its Quality Policy.

“ Forsee Power’s vision is to mitigate climate change with sustainable, zero-emission electromobility. As a signatory of the United Nations Global Compact, Forsee Power is committed to its 10 principles. Our commitments to satisfy our customers, employees, suppliers, and other stakeholders are based on three key focuses.

Fabrice Pégourié,
Quality & HSE Group Director

Drivers

Operational excellence

Economic performance

Customer-focus

Sustainable development

Our commitments around 3 axes

01

Operational excellence

- Designing high-quality, long-lasting systems and products that meet quality and cost objectives.
- Implementing a development process that ensures the maturity of products and processes.
- Optimizing the performance of our operational process and manufacturing procedures.
- Base our passion and our history on technological excellence and continuous innovation.

02

Customer-focus

- Incorporating our customers’ needs by analyzing their requirements, understanding their expectations, and respecting the commitments we make.
- Satisfying stakeholders by identifying risks, planning mitigation actions, and continuously monitoring their effectiveness.
- Managing the Quality of our products and services through effective implementation of our Group’s strategy, supported by:

- Our teams’ skills and expertise.
- A collaborative, solid, structured, and international organization.
- Recognized technological and industrial resources.

03

Economic performance

- Creating value and establishing long-term performance: a significant objective for Forsee Power. Profitability and financial stability are the bedrock of our shared future.
- Improving economic performance by optimizing the efficiency of our product quality and the effectiveness of our processes.
- Optimizing project management to ensure profitability and stakeholder integration.
